• Gujarati

PROJECTS

- **IFOLLOW – Employee Management System (SaaS | Dubai)**

IFollow is a Laravel-based SaaS Employee Management System where I worked on developing the admin panel, integrating email and notification systems, and creating REST APIs for a mobile application. I also handled backend bug fixes, optimized business logic, and ensured system stability for live production use.

- **ACMAN – Electronics Service Management Platform**

ACMAN is a Laravel-based service platform for electronics maintenance. I developed plan-based user modules, implemented login and registration, integrated notifications, and built REST APIs for mobile apps. I also resolved backend issues and improved overall system performance.

- **JANTU NASHAK – Product Selling Platform**

Jantu Nashak is a CodeIgniter-based product selling platform. I developed a reward system, created REST APIs for the mobile application, and fixed backend bugs to improve performance and reliability in a live environment.

- **KEEP APP – Traditional Clothing E-Commerce Platform**

Keep App is a CodeIgniter-based e-commerce platform for traditional clothing. I integrated the Delhivery shipping portal, implemented an order tracking system, and developed REST APIs for the mobile application, along with backend bug fixes.

- **MYM – Matrimonial Platform**

MYM is a CodeIgniter-based matrimonial platform. I developed REST APIs for matrimonial requests, implemented a user approval system, and handled backend validations and bug fixes to ensure secure and smooth application flow.
